# Umar Farook Shaik

umerfarook@gmail.com | 8341383305
github.com/umarfarook049 | linkedin.com/in/umar-farook-68b78a248

## Skills

**Languages:** Java, Python, C, JavaScript, SQL, React JS

**Technologies & Tools:** Java full stack, OOPs, DSA, Operating System, Computer networks, Salesforce, Git and Github, Machine Learning, Artificial Intelligence, ollama, RAG, python.

## Work Experience

**NVIDIA Graphics Pvt Ltd, Pune** April 2026 - September 20226

**Payroll : Randstad Digital**

***Data Labeling and Data Annotation QA***

- Annotated raw video footage and multi-sensor datasets for autonomous vehicle AI models at NVIDIA (via Randstad), maintaining over 98
- Consistently met and exceeded daily Key Performance Indicators (KPIs) and SLAs using 2D/3D bounding boxes, semantic segmentation, and polygon annotation techniques.
- Conducted cross-functional quality assurance audits and error analysis, driving workflow adjustments that boosted daily frame throughput by 10–15
- Data Annotation, Computer Vision, Semantic Segmentation, Bounding Boxes, Quality KPIs, SLA Management, Edge-Case Auditing, Data Labeling, QA Auditing

**ExcelR IT Institute, Bangalore** December 2023 - May 2024

***Java Full Stack Developer Intern***

- Developed a full-stack Employee Management System using React.js for the frontend, Spring Boot framework for the backend, and MySQL for database management.
- Built RESTful APIs in Spring Boot to handle seamless CRUD operations for managing employee records.
- Designed an interactive and responsive UI using React.js and modern CSS frameworks to enhance user experience.
- Utilized MySQL for storing and managing employee data with optimized queries for high performance.
- Integrated frontend and backend modules seamlessly to enable real-time data synchronization and efficient client-server communication.

## Education

**SVR Engineering College, Nandyal** Aug 2020 - July 2024

B.Tech. in Computer Science and Engineering ***CGPA: 7.76/10***

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

## Project Work

- **Satellite Image Classification:** Developed a CNN deep learning model using TensorFlow and Keras with transfer learning to classify satellite imagery into land cover types (forests, water, urban areas), bypassing cloud and tree canopy obstructions to eliminate manual ground-truthing delays in disaster detection. Python, TensorFlow, Keras, CNN, Deep Learning
- **Local AI Chatbot (RAG-Powered):** Developed a ChatGPT-like conversational AI application using Python, Ollama, and the Qwen3:4b model, integrating Retrieval-Augmented Generation (RAG) with vector embeddings and NumPy to enable secure, context-aware querying of private organizational data locally. Python, Ollama, Qwen3:4b, RAG, Vector Databases, NumPy
- **Amazon Clone E-Commerce Website:** Developed a static frontend e-commerce web platform replicating the core UI of Amazon. HTML, CSS, JavaScript
- **Flipkart Clone E-Commerce Website:** Built a responsive frontend web application featuring user registration and login functionality with local storage credential management. HTML, CSS, JavaScript
- **Rock-Paper-Scissors Game:** Created an interactive web application allowing users to play Rock-Paper-Scissors against an auto-generated computer opponent. HTML, CSS, JavaScript

## AWARDS AND CERTIFICATES

- **Salesforce Developer Virtual Intern (SmartInternz):** Learned platform development using Apex, Lightning components, and database objects.
- **Intelligent Automation Virtual Intern (Blue Prism):** Gained practical experience building RPA workflows to automate business processes.
- **Future Ready Talent Virtual Intern (Microsoft):** Worked on cloud computing fundamentals and solutions using Azure services.
